Professional Summary

Fresh graduate in Engineering Management from Institut Teknologi Del with internship experience in Production Planning & Inventory Control (PPIC) and academic experience in supply chain analysis, inventory monitoring, production planning, market research, cost and business feasibility analysis, and project coordination. Experienced in working with operational data, material flow, reporting, and cross-functional coordination. Interested in roles involving purchasing support, material planning, supplier coordination, cost analysis, and operational improvement.

Education

Bachelor's Degree in Engineering Management
Faculty of Industrial Engineering, Institut Teknologi Del
GPA: 3.42

Sitoluama, North Sumatera
September, 2026

Work & Organization Experience

Production Planning & Inventory Control - Internship
PT Bhirawa Steel

Surabaya, East Java
Jun 2025 - Aug 2025

- Monitored production schedules and inventory levels to support material availability for production.
- Coordinated incoming raw material flow with suppliers and warehouse teams to help prevent stockouts and production delays.
- Analyzed production and inventory data and prepared monthly reports to support supply chain and planning decisions.
- Collaborated with production, warehouse, and procurement teams to identify process bottlenecks and propose corrective actions.

Academic Assistant for Mathematics II
Institut Teknologi Del

Sitoluama, North Sumatera
Jan 2025 - May 2025

- Tutored more than 62 students in Mathematics II through structured learning sessions and problem-solving support.
- Assisted the course lecturer with examination planning, proctoring, and assessment administration.
- Coordinated academic support activities with the lecturer and students.

Academic Assistant for Mathematics I
Institut Teknologi Del

Sitoluama, North Sumatera
Aug 2024 - Dec 2024

- Provided individual tutoring and problem-solving support to more than 62 students in Calculus I
- Reviewed assignments and examinations and gave constructive academic feedback.
- Communicated regularly with students and the course lecturer on learning progress.

Engineering Management Student Association - Chief of Public Relations Division
Institut Teknologi Del

Sitoluama, North Sumatera
Nov 2023 - Nov 2024

- Supported internal and external communication strategies for the association.
- Coordinated division activities and kept team tasks aligned with the division's objectives.
- Led division operations in the absence of the division head.

Engineering Management Student Election Committee - Member of Publications & Public Relations Division
Institut Teknologi Del

Sitoluama, North Sumatera
Oct 2024 - Nov 2024

- Managed communication with stakeholders throughout the election process.
- Administered social media content, infographics, and official announcements.

Projects

Ratun GO Rice Thresher

Contributed to a community-based project developing a rice thresher for farmers in Patane 2 Village, aimed at improving ergonomics, working efficiency, and occupational safety. Gathered customer needs through market research, proposed ideas for the product concept, and supported supply chain and sourcing analysis. Provided cost input through component and material evaluation (RC Ratio) and helped assess business feasibility to shape a viable commercialization plan.

Engineering Management
Capstone, Institut Teknologi Del
2025

Tipa Tipa Traditional Food Packaging

Designed packaging for tipa-tipa, a traditional Batak food product, using SolidWorks, balancing visual identity, functionality, and production cost efficiency. Conducted market research and competitor packaging analysis, developed the product concept and packaging design, and managed prototyping, iteration, and final product evaluation to keep the design aligned with production feasibility. Applied project management principles from concept to prototype.

Product Design & Development,
Institut Teknologi Del
2025

Phone Holder

Designed a multifunctional phone holder with a focus on charging convenience, ergonomics, cost efficiency, and market potential. Developed 3D models and simulations in SolidWorks to validate design integrity before physical prototyping.

Visualization & Engineering
Drawing, Institut Teknologi Del
2025

Bridge Structural Analysis

Applied structural principles to design and build a load-bearing bridge model from wooden sticks. Tested the model to evaluate its load capacity and material efficiency.

Engineering & Design,
Institut Teknologi Del
2025

Certifications & Training

SolidWorks Essentials Certification

Jul 2026

- Description: Formal training in part modeling, assembly design, and engineering drawing production.
- Skills Developed: 3D modeling, assembly design, technical drawing.

Logistics & Supply Chains

Jul 2026

- Description: Training covering supply chain fundamentals, network and warehouse design, material handling equipment (MHE) selection, risk categorization, and statistical analysis.
- Skills Developed: Supply chain and warehouse design, operational management, data-driven decision-making.

Student Entrepreneurship Development Program

Jun 2024 - Oct 2024

- Description: Program to develop and present a business concept.
- Skills Developed: Market research, customer needs analysis, business concept development, presentation.

Additional

Language Skills: Indonesian (Native), English (Professional Working Proficiency)

Tools: Microsoft Office Suite, SolidWorks, SPSS

Core Skills: Supply Chain Management, Inventory Management, Production Planning (PPIC), Logistics, Material Flow, Market Research, Cost Analysis, Business Feasibility Analysis, Project Management, Data & Report Analysis
